**For Release Wednesday February 13, 2008**

### **iVoice, Inc. Announces New Patent Application Filing on Methodology for Wirelessly Loading Over-The-Counter Medicine & Prescription Bottle Containers with Voice Instructions Through Wireless Technology**

#### ***New Feature Includes an Internal Clock for Pill Supervision***

MATAWAN, N.J.--(BUSINESS WIRE)--February 13, 2008- iVoice, Inc. (OTC Bulletin Board: IVOI), announced today it has filed an additional patent application with the U.S. Patent and Trademark Office. The application is titled: Methodology for Wirelessly Loading Speaking Medicine Containers, with an internal Clock.

The invention relates to speaking instruction medicine containers. The new feature includes a compliant warning having an internal clock, medicine container starting table count, required consumption data, and programming. The internal clock is started when a patient activates the audio playback start means for a first time. When a user subsequently activates the audio playback start means at a later time, the microprocessor plays back a regimen message advising the user that a predetermined number of tablets should be remaining in the medicine container at this time, and if that predetermined number of tables remaining is in excess by a predetermined amount, the patient is advised to contact a doctor or pharmacist. The microprocessor calculates current tablet count based upon the first activation, the total starting tablet count, and the tablet consumption rate data.

#### **About iVoice, Inc:**

iVoice has determined that the best way to create shareholder value, separate and apart from the operating performance of iVoice, is to spin-off previous wholly owned subsidiaries of iVoice to its shareholders by distributing shares of these subsidiaries in the form of a special dividend. To date, iVoice has successfully completed the spin-off of Trey Resources, Inc. (OTCBB: TYRIA), iVoice Technology, Inc. (OTCBB: IVOT), SpeechSwitch, Inc. (OTCBB: SSWC) and Thomas Pharmaceuticals, Ltd (OTCBB: TPHM). The common stock distributions are part of a broader strategy relating to the transition of iVoice into a company focused on the development and licensing of proprietary technologies. We also continue to search for potential merger candidates with or without compatible technology and products, which management feels may make financing more appealing to potential investors.

Certain information included in this press release, may contain forward-looking statements about our current and expected performance trends, growth plans, business goals and other matters. These statements may be contained in our filings with the Securities and Exchange Commission, in our press releases, in other written communications, and in oral statements made by or with the approval of one of our authorized officers. Information set forth in this press release contains various "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. The Private Securities Litigation Reform Act of 1995 (the "Act") provides certain "safe harbor" provisions for forward-looking statements. The reader is cautioned that such forward-looking statements are based on information available at the time and/or management's good faith belief with respect to future events, and are subject to risks and uncertainties that could cause actual performance or results to differ materially from those expressed in the statements. Forward-looking statements speak only as of the date the statement was made. We assume no obligation to update forward-looking information to reflect actual results, changes in assumptions or changes in other factors affecting forward-looking information. Forward-looking statements are typically identified by the use of terms such as "anticipate," "believe," "could," "estimate," "expect," "intend," "may," "might," "plan," "predict," "project," "should," "will," and similar words, although some forward-looking statements are expressed differently. Although we believe that the expectations reflected in such forward-looking statements are reasonable, we can give no assurance that such expectations will prove to be correct.
