About iVoice, Inc:

iVoice has determined that the best way to create shareholder value, separate and apart from the operating performance of iVoice, is to implement new business opportunities by distributing shares of spin-offs to the company's shareholders. The common stock distributions are part of a broader strategy relating to the transition of iVoice into a company focused on the development and licensing of proprietary technologies. We also continue to search for potential merger candidates with or without compatible technology and products, which management feels may make financing more appealing to potential investors.
